

Consultation – Proposal to retire the 4+2 internship pathway

25th of May 2018

To whom it may concern,

I am writing to provide my feedback on the proposed retirement of the 4 + 2 pathway for registration. As a student completing my final year of study, I am aware of the challenge of finding suitable employment, supervisors and starting the registration process. It is my preference that the 4 + 2 pathway not be retired until 2020, to allow more time for those still completing their studies to start the process.

Kind regards,
